

PAPER AND POSTER PRESENTATION ABSTRACT TOPICS

**“Research is to see what nobody else has seen, and to think what nobody else has thought”
–Albert Szent**

The paper and poster presentation invites the amateur scientists to present their talents in research. This year the event paper and poster presentation competition revolves around four main themes.

1. **Energy**
2. **Nanotechnology**
3. **Computational**
4. **Efficient materials**

The students of the following departments are eligible to participate in this event.

1. Applied Mechanics /Mechanical Engineering/Engineering Design
2. Biotechnology
3. Department of Chemistry /Chemical Engineering
4. Department of physics
5. Civil Engineering
6. Electrical Engineering
7. Metallurgical and Materials Engineering

NOTE :

1. **Projects by undergraduates are highly encouraged.**
2. **Only novel and original projects/research papers are accepted.**
3. Students from other departments are also encouraged to participate provided their work strictly falls under any of the subtopics mentioned above.
4. Students can form a team with maximum of **4 members**.
5. **Evaluation:** Teams will be evaluated based on the novelty of idea, depth of analysis, clarity, experimental and technical details.
6. **All decisions by the coordinators are final and binding.**

Problem Statement, Rules and Scoring may change and all changes shall be reflected in the Sha Astra website. And hence, the teams are responsible for keeping themselves well informed about the event. Keep visiting the website www.shaastra.org for updates regarding the event. For any queries please mail us at paperandposter@shaastra.org with the subject as “Query:<query-topic>”
